TRAINING & STUDIES

Web developer-integrator (Esecad)

DECEMBER 2018 - SEPTEMBER 2019 (9 months)

Distance learning in web development to master the basics of HTML, CSS and PHP.

Web and mobile web developer (WebForce3)

OCTOBER 2019 - JUNE 2020 (6 months, 700h)

Intensive classroom training. Study of all the essential notions for the development of a web application by various technologies, starting with the front-end, back-end, wordpress and responsive web design.

June 2020: Obtaining the CNCP titles Web Integration Techniques n°1447 & Web Development Techniques n°1448 in web and mobile development (level Bac+2).

PHP Symfony developer (WebForce3)

NOVEMBER 2020 - FEBRUARY 2021 (3 months, 400h)

Back-End distance learning to deepen current PHP skills in the areas of OOP and modeling, then learning the Symfony framework.

Full Stack Developer (WebForce3)

FEBRUARY 2021 - FEBRUARY 2022 (1 year)

Work-study program under an apprenticeship or professionalization contract, with three weeks in the company and one week in training with Webforce3: in-depth study of Symfony, Angular and Wordpress, then learning about UX Design, Ajax and the Agile method.

JOBS

Dimo Software, Web Developer Internship

APRIL 2019 - MAY 2019 (1 month)

In an environment requiring PHP, Wordpress CMS and agile method, I assisted the developers in various tasks and meetings.

Amiltone, Angular & Node.js web developer

FEBRUARY 2021 - FEBRUARY 2022 (1 year)

Developer role in a Web Factory team to maintain and resolve bugs & develop new features for the company's CRM intranet site. Development process based on AGILE methodology.

Positive Thinking Company, Full Stack Developer

JUNE 2022 - TODAY (10+ months)

Developed web applications using Angular, Vue, React, PHP and Laravel technologies for several clients: Development of new features, maintenance and bug fixes, meeting requirements through mockups and technical specifications.
